ABOUT ME & SKILLS

Recently graduated from Siliconmade Academy's software development program, I have developed a solid foundation in key programming languages and frameworks such as C#, .NET , Vue.js, and JavaScript. My education went beyond coding to include essential skills like problem-solving, teamwork, and adaptability to new tech trends. Through various projects, I've applied these skills practically, demonstrating my capability in both front-end and back-end development. Eager to contribute to innovative software solutions, I am looking for opportunities to apply my skills in a dynamic environment, continue learning, and make a positive impact.
